Subject: FW: PFCs Project Overview for Connecticut (or others)
[Overview of PFCs project.docx](#)

Morning all

Remember our last EPA/State DW Coordination Meeting – we discussed a special project that a team of regional staff is pursuing to attempt to identify potential sources of PFOA/PFOS.

While this project has still to be briefed to regional upper management , we agreed to send you information on the protocol for developing potential locations of PFOA/PFOS sources and associated public water supply wells. Preliminary date to finalize project is end of May.

Attached you will find the protocol , compliments of Jeri Weiss.

We can discuss further, but at the coordination meeting , CT offered to be a test state and RI was interested in getting the final data sets.

For those states VT and NH that have pursued similar mapping efforts, please feel free to offer suggestions and questions and I will forward to Lynne Jennings who is managing the effort.

More to come on this

Take Care

Jane (and Jeri)
